

LEISTRITZ - THE SERVICE PROVIDER FOR SCREW PUMPS

Knowledge transfer

Educating your staff in your plant or in our factory, helps you to prevent errors and thus saves costs. In addition, our experts can provide advice on the topics operation, maintenance, availability and energy consumption.

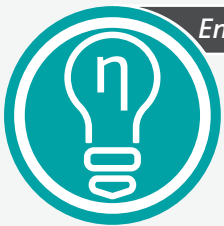

- Theoretical and practical training
- Advice

Maintenance

Within the context of preventive maintenance, we agree regular service intervals with you in order to maintain and optimize your pumps even before a repair is required.

- Health checks
- Condition monitoring
- Maintenance contracts
- Innovative spare parts concepts
- Global network of service technicians
- Upgrades of pumps or the entire pump unit

Energy consumption

You can save money through an analysis of your pump unit. We perform an efficiency analysis, for example, and then give you advice.

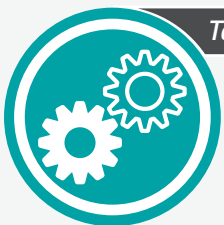

- Health checks
- Efficiency analysis
- Upgrades of pumps and drives

Availability

Ensuring high availability for your pump unit helps you to minimize down-times and saves costs. Our service supports you here with:

- Health checks
- Condition monitoring
- Innovative spare parts concepts
- Express production of spare parts

Technology

We choose the perfect solution for the use of your screw pump, according to your requirements, with the aim of optimizing the total costs of ownership. To this end, we offer:

- Efficiency analysis
- Remote control
- Smart sensors
